ARNOLD ARBORETUM, HARVARD UNIVERSITY.

Jamaica Plain, Mass., 7 el 23 1801 Dear Mr Collins Thank you for your note of the 20th. It is not probable that & shall attempt to visit Providence for another month at least as little could be done carlier so for as I am concerned, I feel that you could probably manage it all quite well without councili me, but river I have been asked to do so I shall he very glad to cooperate with you in regard to the preliminary plans. When I think the

line seems propitions for a visit I shall let you know a day or two beforebound when 9 think 9 car go. If, on the other hand, you would like To see me sooner I shall obey your summers or come y famille. De Bumpus water me that the cemetery reaple had promised a contribution of plants for the warrang, oc + as soon as spring fairly opens I would be glad & so over their ground with you They could furnish yours truly

Systact of Bota Prof. J. Frankli Collin ARNOLD ARBORETUM, HARVARD UNIVERSITY.

Jamaica Plain, Mass., Mrh 27 1801 Dea ha Calling This morning is so unproving for a desert ofternoon for the work at Swan Point cemetery That it seems very probable my Try soil have to be deferred! Thursdays, Fridays + Tuerdays & have to give lectures at the Tech, so that those days are out of the question This Saturdy (30th) I have an engagement in Thy evening which ought to bring me back a little earlier Than the 5.02 train from Providence mould allow. I magine Too that it may not be quite so convenient as other afternoons, with for you on the concley people.

I shall therefore propose next

Monday afternoon (apr 1) + y Watis unfavorable 9 shall try to go on Wednesday. My going of course is defended upon whether it is ferfeally convenient for you & meet me. In any care I should Take The 1.03 train from Boston or go directly to your faboratory. Of course if this afternoon Turns out clear 9 shall go in spite of The promise of mud, but I shall not go if well an Threating as 9 home some you have bad as well as for my own beelings is well.

John truly

June 4, 1910. Mr. Joseph Jackson, 15 Woodland St., Worcester, Mass. Dear Mr. Jackson: -I want to thank you for the very interesting new edition of the Worcester Col flora which Professor Poland handed to me a few days ago. I am very glad to get it. I have not forgotten the pleasant day's trip which you made some years ago to Mt. Wachusett, at the time I was visiting with Frofessor Dailey at the Grand View House at the foot of the mountain. If I had the sight of my initials in several places in the flora would have recalled the day. Very truly yours,

CONSTITUTION

OF THE

Josselyn Botanical Society

OF

MAINE.

ADOPTED AT FARMINGTON, JULY 7-10, 1896.

...CONSTITUTION...

ARTICLE I.

NAME AND OBJECT.

The name of this Organization shall be the Josselyn Botanical Society of Maine; and its object shall be to promote the study of the Flora of the State.

ARTICLE II.

OFFICERS.

The officers shall be a President, five Vice-Presidents, a Secretary, an Assistant Secretary and a Treasurer; and their duties shall be those usually performed by such officers. They shall be elected annually, and shall hold office until others are elected in their place.

ARTICLE III.

MEMBERSHIP AND FEES.

Any person interested in botany shall become a member by vote of the Society, and by payment of the necessary fee. The initiation fee shall be one dollar. For the first year of membership there shall be no assess-

ment, but after that there shall be an annual fee of fifty cents.

ARTICLE IV.

COMMITTEES.

Such Committees shall be appointed as the work of the Society shall make necessary. The Executive Committee shall be composed of the officers of the Society and the Chairmen of the various Committees; and those present at any regularly called meeting shall have power to transact the business of the Committee.

ARTICLE V.

MEETINGS.

The Society shall hold an Annual Meeting. Special meetings shall be called at the discretion of the Executive Committee.

ARTICLE VI.

AMENDMENTS.

This Constitution may be amended at any meeting of the Society by vote of two-thirds of the members present.

The Committee of Arrangements of the JOSSELYN BOTANICAL SOCIETY announce that the Annual Meeting and Field Day of the Society for 1902, will be called at Machias, July 8 to 11, inclusive.

Announcement of our programme and transportation and hotel arrangements will be sent to members two weeks previous to the meeting.

THURSDAY, JULY 10TH,

Excursions.

8.00 P. M.—The Sea Weeds of New England,
By Frank Shipley Collins.

FRIDAY, JULY 11TH.

Excursions.

8.00 P. M.—Business and Social Meeting and Adjournment.

ANNOUNCEMENTS.

Tickets for Machias and return may be bought on or after Monday, July 7th, at the Maine Central R. R. stations named in the enclosed list or at any stations of the Washington County R. R., at one fare for the round trip. These tickets will be good for return on or before Saturday, July 12th.

The headquarters of the Society will be at the Eastern Hotel, Machias, where rooms and board may be had at \$1.50 and \$2.00 per day. The committee think it desirable for all members of the Society to take rooms at this hotel, but if any desire rooms and board elsewhere they may be secured, at reasonable rates, on application by letter to the Chairman of the Committee of Arrangements.

Members should plan to reach Machias, Monday evening, July 7th. Train leaves Portland at 10:15 A. M.; Brunswick, 11:10; Waterville, 1:35 P. M.; Bangor, 3:15; arriving at Machias at 6:28.

During the evening we hope to meet some of the people of Machias and vicinity who are interested in the Josselyn Society, and to complete the plans and preparations for the Field Day Excursions.

Josselyn Botanical Society of Maine.

To Franklin Collins.

In compliance with the expressed wishes of many members of the Josselyn Botanical Society of Maine, we have decided to arrange for the Seventh Annual Meeting and Field Day of the Society at some point on the coast of Maine near Penobscot Bay, or farther east. As an aid to us in selecting a place that will be convenient and satisfactory to the greatest number, we ask you to state whether or not you expect to attend the meeting this year, what date you would prefer for the meeting, and what place within the limits mentioned.

Make such remarks and suggestions as you may wish, all on the enclosed sheet, and return it at once to the chairman of the Committee of Arrangements.

The Maine Central and the Washington County Railroads will give us half fare to any station on either of these roads.

D. W. FELLOWS,

B. P. SNOW,

M. A. CLARK,

UNION MEETING at SKOWHEGAN

.....

JUNE 29 to JULY 3, 1903

Programme.

130

Monday, June 29th.

8.00 p.m Social Meeting at the Library Parlors.

Address of Welcome by Prof. A. L. Lane, President of the Josselyn Botanical Society.

Response by Capt. H. L. Spinney, President of the Ornithological Society.

Tuesday, June 30th.

8.30 a.m. Business meetings of both societies.

Ercursions.

8.00 p.m. "The Flora of Eastern Massachusetts in reliation to the Flora of Maine," by William Penn Rich.

Wednesday, July 1st.

Excursions.

8.00 p.m. "Birds from a Light-house," by Capt. Herbert L. Spinney.

Thursday, July 2d.

Excursions.

8.00 p.m. "The Fern Plants of New England," by Alvah Augustus Eaton.

Friday, July 3d.

Excursions.

8.00 p.m. "The Economic Value of Birds," by John Merton Swaine.

Announcements.

Tickets for Skowhegan and return may be bought on or after Monday, June 29th, at the Maine Central Stations named in the enclosed list for one fare the round trip, and at any station of the Washington County R. R. for one and one-third fare. These tickets will be good for return on or before Saturday, July 4th.

The headquarters of the two Societies will be at the Hotel Coburn, Skowhegan, where board and rooms may be obtained by those attending these meetings, at \$1.50 per day.

Members should plan to connect at Waterville with the train leaving that place for Skowhegan at 4.20 p.m., Monday.

The two Societies will make one or more excursions each day, either together or in different parties, to interesting and accessible localities by electric cars and by carriages.

The evening meetings will be held at the Library Parlors, and all persons interested are cordially invited to attend, and also to join in the excursions.

Josselyn Botanical Society of Maine.

This Society will hold its Tenth Annual Meeting and Field Day at Fort Kent, Aroostook County,

JULY 6TH, 1904.

Extremely low rates will be granted by the Maine Central and Bangor & Aroostook Railroads. The Hotel Dickey at Fort Kent also offers greatly reduced rates. Tickets will be made good to remain two weeks and it is hoped all members will avail themselves of the opportunity thus offered to visit this wonderfully rich portion of the State.

Programmes and detailed information will be sent to members, June 15th.

DORA H. MOULTON, Secretary,

9 Hill St., Portland, Me.

ANNOUNCEMENT

OF THE

TENTH ANNUAL MEETING

AND

FIELD DAY

OFTHE

Josselyn Botanical Society

OF MAINE.

 \mathbf{x}

FORT KENT, MAINE, JULY 6, 1904. THE excursion of the Josselyn Botanical Society of Maine this year will be by the Bangor & Aroostook Railroad to Fort Kent, on the St. John, at the mouth of Fish River. Here the annual meeting of the Society will be held, and the field work will be continued during the four days of the meeting, and it is hoped that many members will remain for a longer time.

Botanists from New Brunswick and Nova Scotia are invited to join us at Fort Kent, and we are assured that these Provinces will be well represented.

RAILROAD AND HOTEL ARRANGEMENTS.

Tickets for the round trip may be obtained on Tuesday, July 5, at any ticket office of the Maine Central Railroad on the enclosed list, for one fare to Old Town and five dollars additional. These tickets will be good for return for two weeks.

Members may take train leaving Portland at 10:30 P. M. Tuesday, or 12:55

midnight, and connect with train leaving Bangor at 7:10 A. M., Wednesday, July 6. Both these trains have sleepers without change at Bangor. Tickets are also good to go to Bangor on any train Tuesday and remain over night.

The headquarters of the Society will be at Hotel Dickey. Rate, \$1.50 a day.

Program.

Wednesday, July 6, at 8 p. m., a business meeting of the Society is called.

FRIDAY, July 8, at 8 P. M., Mr. Merritt Lyndon Fernald will address the Society on "The Flora of the St. John Valley".

The committee recommend that evenings for which no other provision is made be devoted to informal meetings for comparison of notes and collections.

It is hoped that each standing committee will be prepared to report at this meeting.

ANNOUNCEMENT

OF THE

ELEVENTH ANNUAL MEETING

AND

FIELD DAY

OF THE

JOSSELYN BOTANICAL SOCIETY

OF MAINE

55.00

AT KITTERY POINT AUG. 14-18, 1905 THE JOSSELYN BOTANICAL SOCIETY OF MAINE will have its annual meeting this year at Kittery Point: This is the extreme southern point of the state, and many plants of southern range not yet reported from the state are to be looked for. The attendance of several botanists from Washington and other places will add much to the interest and value of the meetings.

Tickets at reduced rates may be obtained at any station of the Maine Central Railroad on the enclosed list. Call for tickets to Kittery Point and return on account of the Josselyn Botanical Society.

Kittery Point is reached by trains of the Eastern division of the Boston & Maine Railroad to Kittery Junction, thence by electric cars to Hotel Champernowne, Kittery Point.

Members should plan to reach the hotel not later than six o'clock Monday evening. August 14, that they may be present at the business meeting of the Society on that evening.

Accommodations, including rooms and board for members and guests of the Society, will be provided at the Hotel Champernowne, Kittery Point. Rates, \$2:00 and \$2.50 a day.

PROGRAM

Monday, August 14, 8 P. M., a meeting of the Society will be held for the transaction of business; including reports of all standing committees.

Tuesday, August 15, 8 P. M., Dr. Fred Dayton Lambert, of Tufts College, will speak on "The Alternation of Generations in Plants." This will be a public meeting, and all persons interested are cordially invited to attend.

On the evenings of Wednesday and Thursday informal meetings of the Society will be held for various reports and for comparison of notes and collections:

The 1906 meeting of the Josselyn Botanical Society of Maine will be held the first week in July, at the Rowe Ponds Camps, Pleasant Ridge Plantation, Somerset County, where very favorable terms have been secured. A special rate of 1 3-4 cents per mile has been assured by the Maine Central Railroad. This meeting is to be held in the Maine woods, and will be particularly unique and interesting. The camps are about 10 1-2 miles northwest of Bingham—the nearest village—and are reached by carriage (7 1-2 miles), and buckboard (3 miles).

Further and more detailed information will be sent to the members in June.

ARTHUR H. NORTON,
Secretary.

tind fought on at a pleating dream that of the trind and land enger Of every cety tone

JOSSELYN BOTANICAL SOCIETY OF MAINE

Twelfth Annual Meeting, July 3-6, 1906

ROWE PONDS CAMPS

lake and stream. This region has a decidedly different flora from any which the society has previously visited.

Members should reach Bingham on the afternoon train of Monday, July 2, and engage rooms at the Bingham Hotel for the night. Late in the afternoon or early the next morning it will be possible to do some collecting in the vicinity. The next forenoon (July 3), at about nine o'clock, the party will leave Bingham Hotel, in Mr. Healy's teams, for Pleasant Ridge, seven miles distant. Occasional brief stops can be made, as well as one of longer duration, in order to visit the picturesque and botanically interesting Houston

Brook Falls (50 feet high), a short distance from the road. Luncheon will be served at Mr. Healy's house on the Ridge at about noon, or a little later, after which the start will be made for the camps. These are three and one-half miles distant, nearly three miles being over a buckboard road where most of the members may prefer to walk, both for pleasure and in order to botanize.

The eleven cabins at the pond, built of logs, are comfortable, clean, dry and well-ventilated. The clearing is bounded on three sides by the unbroken forest, and on the northeast by Rowe Pond, on which good and serviceable boats are kept for the use of guests. This beautiful sheet of water is about one and one-quarter miles long and is 1,206 feet above sealevel. Four smaller ponds are within easy reach. Bean Pond to the northeast and Clear (or Mill) Pond to the southward are each about three-quarters of a mile distant. Jewett Pond to the northwest is so close to the foot (or "Basin") of Rowe Pond, that it is almost a continuation of it, while the small and bog-bordered Brandy Pond, abounding in water-plants, is hardly two hundred yards from the main pond, to the northward. All are reached by good trails starting at different points on the shore of Rowe Pond.

VIEW FROM BASIN, LOOKING THROUGH NARROWS

The old "Canada Road," long since abandoned, can still be followed as a trail through the forest. At one point it is scarcely one hundred feet from the western shore of Jewett Pond. It usually affords good botanizing. About three and one-half miles away, to the northwest, are the Carry Ponds

Camps. Parties desiring to visit these, or to make any other extended trip into the forest, can obtain guides at reasonable rates at the Rowe Ponds Camps. Each member is advised to bring a pocket compass.

The meeting will continue until Friday or Saturday morning, when members can leave in time to get the afternoon train from Bingham.

RATES.

M. C. R. R. One and three-quarters cents per mile (to Oakland), from the following stations: Portland, Cumberland, Lewiston, Wilton, Farmington, Readfield, Brunswick, Gardiner, Hallowell, Augusta, Waterville, Fairfield, Skowhegan, Bangor, Orono, Ellsworth, Washington Junction and Machias. Tickets will be sold from the 2nd to the 6th, and will be good for return until July 10th.

SOMERSET RAILWAY. Oakland to Bingham and return, the regular rate of \$1.90.

BINGHAM HOTEL. Supper, lodging and breakfast, July 2-3, \$1.50 for one in a room; \$1.25 for two in a room.

MR. HEALY'S TEAMS. Bingham to Rowe Pond and return, including luncheon on July 3, and transportation of baggage, \$2.25.

This rate applies only to members who go and return at the times mentioned above. Those who intend going either earlier or later should write Mr. A. L. Healy (P. O. address, *Bingham*, *Me.*), of their intentions at least three days in advance.

ROWE PONDS CAMPS. Not over \$1.25 per day, including boat.

The wilderness is calling us,
We cannot answer "nay";
We'll gladly leave the dusty streets
For this, a holiday.
Beneath the leafy canopy,
Where soughs the woodland breeze,
We'll wander o'er the winding trails
Among the forest trees,
And breathe, in Nature's solitude,
That balsam-scented air,
For which we yearly long and wait,
Though often unaware.

The Eighteenth Annual Meeting.

The Josselyn Botanical Society of Maine will meet at Gardiner, August 7, 1912, for three days' work in the field. Hotel rates will not exceed two dollars per day, and we hope to secure reduced fare on the Maine Central Railroad from all points.

The summer meetings of this Society, since its organization, with three exceptions, have been held in June or early in July, and these three were on or near the seashore, so that this is the first opportunity offered for the collection and comparison of plants of the interior of the State in the month of August. This will afford a series of flowering plants differing much from those of June or July. Make your plans now to attend, and further notice, with additional information, will be sent two weeks previous to the meeting.

EIGHTEENTH ANNUAL MEETING

OF THE

Josselyn Botanical Society of Maine

AT GARDINER AUGUST 7-10, 1912 The Josselyn Botanical Society will meet at Gardiner, August 7, 1912, the meetings and field work to continue during the remainder of the week. Botanists are constantly finding surprises in the ever-fruitful valley of the Kennebec, and the pleasant city of Gardiner is admirably situated as a base from which to explore many interesting localities. Outside the immediate vicinity of the city, with its river banks, hills, meadows, streams and ponds, excursions by trolley and carriages have been planned to reach unexplored lakes, bogs and rich woods.

The committee again call attention to the fact that, with one exception, all previous meetings of the Society have been called much earlier in the season, and at this time, therefore, an entirely different series of flowering plants will be found.

The headquarters of the Society will be at the Johnson House, where accommodations will be provided for members and guests at \$2.00 and \$2.50 per day.

Tickets may be obtained at all stations of the Maine Central Railroad for Gardiner and return for one fare and one-third, good to return till Monday, August 12.

Residents of Gardiner and others interested are cordially invited to attend the meetings and join in the field work and excursions of the Society.

The following program is a part of the report of the Committee of Arrangements, and it may be modified to any extent by the Society to meet conditions:

- Wednesday, Aug. 7, 2.00 P. M. All are urged to be present at this hour at the Johnson House, to accept the invitation of Mr. and Mrs. Robert H. Gardiner to visit their house and grounds during the afternoon.
 - 8.00 P. M. Business meeting, by invitation, at the residence of Mrs. H. K. Morrell, 210 Main Ave.
- Thursday, Aug. 8, 8.30 A. M. Take cars for "Tacoma" for an all-day excursion.
 - 8.00 P. M. A short talk will be given by some member of the Society on some plant family of special interest, and this will be followed by examination and comparison of the collections of the day.
- Friday, Aug. 9, 8.30 A. M. The day will be devoted to carriage drives to Nahum-keag Pond, in Pittston, and other localities of special interest.
 - 8.00 P. M. Business, followed by a short talk on some plant family and informal discussion.
- Saturday, Aug. 10. Short trips in the vicinity of
 Gardiner and such other matters as
 may be arranged by the Society.

The Nineteenth Annual Meeting of the Josselyn Botanical Society of Maine will be held at Thomaston, August 12-16, with headquarters at the Knox Hotel.

Further notice, with program, will be sent to members, and to any persons interested, on request, at least two weeks previous to the meeting.

ANNOUNCEMENT

OF THE

Nineteenth Annual Meeting and Field Day

OF THE

JOSSELYN BOTANICAL SOCIETY

OF MAINE

0

AT

THOMASTON

AUGUST 12-16, 1913

THE annual excursion and meeting of the Josselvn Botanical Society this year will be on the shores of Penobscot Bay, a region which many members have expressed a desire to visit. Headquarters will be at the Knox Hotel, in Thomaston, and many excursions have been planned by trolley, carriage and boat.

The places of interest are so many that the time at our disposal would be quite inadequate for each member to visit all the localities, and the committee wish to divide those in attendance into small parties in order that a larger field may be covered and much more be accomplished. The local member of the committee will be prepared to suggest plans for excursions, and to provide guides as far as possible.

Accommodations may be had for members and guests at the Knox Hotel at \$2.50 per day.

Tickets may be obtained at all stations of the Maine Central Railroad to Thomaston and return for *one and three-fifths fares*.

Members should plan to reach Thomaston not later than six o'clock, Tuesday evening, August 12th, to be in readiness for the first business meeting.

The following announcement is offered for the evening meetings, and for the first Field Day. Plans for subsequent excursions and field work are in the hands of the committee, and will be announced at the meetings.

TUESDAY, Aug. 12. 8.00 P. M. Business meeting.

WEDNESDAY, Aug. 13. An all-day trip to Mount Megunticook in Camden. The ladies to Mount Battie.

8.00 P. M. Business meeting.

THURSDAY, Aug. 14. Excursions and Field Work.

8.00 P. M. Prof. M. L. Fernald will give a formal talk on "The Coastal Plain Element in the Maine Flora,"

FRIDAY, Aug. 15. Excursions and Field Work.

8.00 P. M. A conference is called to consider the organization of a State Scientific Association. The subject will be presented by Mr. N. W. Lermond.

SATURDAY, Aug. 16. Such field work or excursions as the society or members may arrange.

Josselyn Botanical Society.

The meeting of The Josselyn Botanical Society will be held at Manset, Mount Desert Island, August 4th to 8th, 1908. A reduced rate of \$2.00 per day for board and lodging has been granted us by the Stanley House and reduced railroad fares will be arranged for. This is an exceptional opportunity for our members to enjoy an outing on the historic island of Mt. Desert at a price most reasonable, considering that the meeting occurs during the height of the summer season.

A number of interesting trips are planned and it is hoped that many members will avail then selves of the opportunity. Kindly reply immediately on the attached postal card, stating whether or not you think you will be able to attend the meeting, as the committee wishes to reserve accommodations for the members at an early date.

THIS SIDE IS FOR THE ADDRESS ONLY.

ANNUAL MEETING

- OF THE -

Josselyn Botanical Society.

OF MAINE.

All members intending to be at the meeting should plan to arrive at Manset on the afternoon of Tuesday, August 4, planning to leave their homes in season to get the 3.30 p. m. train from Bangor to Mt. Desert Ferry where connections will be made with a boat arriving at Manset at 7.30 p. m.

Reduced rate tickets will be sold by the Maine Central Railroad and by the Bangor and Aroostook to Manset and return. The Maine Central has granted ONE FARE rate from Portland to Manset and return and a one and one-third fare rate from other stations. The Bangor and Aroostook will sell a reduced rate ticket from Houlton. These tickets will be on sale August 1st to 4th, good to return until August 10th.

Reduced rate of \$2 per day at Stanley House, Manset.

The following preliminary programme has been arranged: Meeting of Society, Stanley House, 8.30 p.m. Tuesday, Aug. 4th; excursion to Great Cranberry Island, August 5th, meeting of Society in the evening local trips along the shore from Sea Wall to Bass Harbor Head: August 6th, excursion to Seal Cove Pond: August 7th, other plans to be arranged as circumstances warrant.

Members are urged to make every effort to attend this meeting as it promises to be of unusual interest. Bring your Manuals and also secure if possible, a copy of "Flora of Mt. Desert," on sale by Mr. E. L. Rand, 53 State Street, Boston, Mass.

Write in advance engaging your quarters at the Stanley House, Manset.

Very respectfully

ORA WILLIS KNIGHT

Chairman, Committee on Arrangements

Josselyn Botanical Society of Maine.

The Society will hold its Fifteenth Annual Meeting at the Peaks Island House, Peaks Island, Portland, June 28 to July 2, 1909.

TRAIN AND HOTEL ARRANGEMENTS.

Trains arrive at Portland from Bangor at 5.25 and 5.55 P. M. Trains arrive at Portland from Skowhegan and Farmington at 5.20 and 5.35 P. M.

Tickets should be purchased for *Portland and return*, at the usual reduced rates. These may be obtained at the usual stations, June 26 to 29, good for return till July 10.

At Union Station take red cars, taxicab or hack for the Casco Bay Line of Steamers, which leave Custom House Wharf for Jones' Landing.

Allen's Baggage Transfer Co., with office in Union Station, will deliver baggage at Custom House Wharf, where it must be transferred to Steamer.

Special rate at Peaks Island House, \$2.00 per day. Ralph E. Rowe, Manager, Post Office, Peaks Island, Maine.

EXCURSIONS.

The following excursions for collecting are suggested: One day to Pine Point and Old Orchard. Among the plants that may be found here are Artemisia Stelleriana, Artemisia caudata, Rumex persicarioides, Polygonum exsertum, Ophioglossum and Hudsonia. One day to Falmouth and Cumberland Foreside for Thalictrum dioicum, Hypericum maculatum, Carex brunnescens, Carex maritima, Carex rostrata, Carex retrorsa, and many others. One day at Cliff Island or Long Island, where may be found most of the shore plants, and Holcus lanatus, Elymus arenarius, Convolvulus repens, Veronica longifolia, Centaurea nigra, etc.

Short trips may be made on Peaks Island, to the Cape shore, waste places of Portland for introduced plants, or other localities near by.

Some member of the Society who is familiar with the locality will act as guide on each excursion.

On Monday evening, June 28th, a short business meeting will be called at 8.30.

On Tuesday evening, June 29th, an address will be given by Prof. Merritt Lyndon Fernald, of Cambridge, on "The New England Flora of the Future, or Changes in our Flora due to the Destruction of Forests."

The other evenings will be devoted to business of the Society and to informal talks by Prof. Fernald and others.

Members who expect to attend are requested to report at once to Mr. Rowe, or Dr. D. W. Fellows, Y. M. C. A. Bldg., Portland, so that hotel arrangements may be completed.

EDWARD B. CHAMBERLAIN, Secretary,

Cumberland Center, Maine.

George B. Kaiser, 508 Locust Ave... Germantown, Pa.

Dear Mr. Kaiser:

I have your letter of the 23d of November, also the publication which you so kindly forwarded for me to examine. I will return it to you within a day or two. I notice that it is written by Dr. Conard, who is a particular frined of mine. I would not be surprised if I had a reprint of this article which he has already sent me, but which at present is among my unorganized pamphlets; if not, I am pretty sure I can get a copy directly from him. I want to thank you for you kindness in sending me the information in the letter. I am very glad to get it.

Very truly yours,

Forest Fathologist.

Mr. G. B. Kaiser 508 Locust Ave. Germantown, Pa.

Bear Mr. Kaiser:-

About the middle of March in 1912 I believe Lr. E.B. Chamberlain spent a couple of days with you in Thiladelphia. Soon after his return to New York City he wrote me of having soon a very large oak—the largest he had ever seen he said you were with him and the oak was near Crosswicks, N.J.

I amwwriting to ask if you can give me the exact location of this tree, and also the best way to reach it from Philadlephia. Thanking you for whatever you my be able to tell me I remain

Very truly

508, downt are. Semanton, Pa. 22 Jan. 1917 Dear Profesor Collins, the white oak of which you speak is located in Crossicks, n. 3, - a village reachen by a well of about the miles miles tothe from Boraen on Jas aville amboz Dirision of the Pouns of ramia Railland about 30 miles from Marker It When Phileselphia. Doar Mr. Kaiser:-

Thank you very much for your letter of the 22d concerning the large oaks in New Jersey. I like to have memoranda of this sert, for it sometimes happens in the have an opportunity to look up some of them when I am in the vicinity of large or interesting trees—something I like to do.

I would be very glad if you would-some time--give me more procise directions
for finding the Mt. Royal, Lentua. and
Columbus trees, also the black walnut
I take it the statement that the Salem
tree is in the Feeting House yard will be
sufficiently diffinite. I procure this
means the Friends Keeting Louis (?)

I would perticularly like to know how near I can got to each by any public conveyance-railroad, trolley, bus, etc.

I hope the giving of the desired information will couse you no inconvenience.

Sincerely

Dear 'r. Kennddy

those specimens of Grimmia from Mt. Washington that Dr. whites collected wou will see that his drawings agree with my rough sketches of my sections, only that several of mine were from larger older leaves and showed the cells less frquently bistramatic, the upper small leaves being like his drawings. I have made tracings of them and will man you to return them to him when finished. It ink you are quite right that it is not G. caespitica unless our specimens of (G. sulcata) are misnamed. It agrees better with Limpricat's drawings and description than with our Ru. specimens. It will be well to describe and figure it in Rhodora and I will gladly yilled that privelege to you and Mr. Collins, if you will name the specimen after its discoverer Dr. Evans, if it should prove to be new.

Le lin G. Subsuleate - (nomicous) - from inger of carrier - Consus of an hoy - and hoy - and hope - all white - Ensus of all lelips of them. I have bridler with all post of helps on them.

Dear Dr. Kennedy: -

I am sending under another cover a pamphlet which may be of some interest to you. I would like to ask if you think the last statement on page 3 is true. I question it. You will find the measurement of this pine on page 15.

I have already proved that Mr. Mowry's km statement at the bottom of page 17 is untrue, as I have recently measured two pitch pines in R. I. which are larger than the one mentioned, at least in girth.

Those you are all well and enjoying life in Milton.

I have been up to the Arboretum today looking over the chestnut plantations for the disease. Am glad to say that I found none, the tree infected in the winter having been cut down.

Cordially,

19 May 1910 Has Collins, your letter paraphter currie safely: Jam greath Ruspisson at the great innext. taken in arton day a mot oddernið augsturig leke ir in mars: the Called is well month Friserving: Char Favor the by cuepacher Pine as more of aux n. J. Kennery

Dear Dr. Kennedy: -

Your letter of the 19th of May came in due season. Within a few days after it came Mr. Preston and I had planned to go out to Chepachet and again see the big pine. Mr. Preston tried to get you on the long distance telephone, but you were away for the day when he telephoned. He wanted to tell you about our planned trip for the following day and see if you and Mr. Faxon could arrange to join us. As it happened it rained and we did not go. Since that time I have been unable to see any clear day for such a trip until now, so I have not written you. At the present time it looks as if I could go out with you on either Thursday, June 2, or on Monday, June 6. Are either of these dates satisfactory to you and Mr. Faxon?

Chepachet is up in the northwastern part of the state, about an hours ride from Providence. Trains leave Providence at 6.40, 8.40, and 11,45 a.m., for Oakland, the nearest R.R. station. The tree is about 3 miles from the station. Trains return at 12.55 and 4.35 p.m. On and after June 8 I could arrange to go out with you almost any day, if I knew about it a few days ahead of the time. I do not expect to start on my summer's work until the latter part of June of the first of July, soperhaps I can get up to Readville some time in June. I don't know yet whether I shall remain about Providence during the whole of June.

Am glad to hear that you are all in good health. We are about as usual here.

Dear Collins, Martayon I have arranged to Start for Fetersham mass on Thursday June 2° + I shall return on There on Froday time 10th I gotothe White Mts, to return fune 18th so if the above plans are carried out I do not see how me can arrange for a Chepacher Hay at present: However if the trips of June 10th 18th is given by or modified I will certainly let you know.

It is an untomobile tip with four or five college classmates, (we took a similar Berkshire ride last years and may possibly not come of but frobably will the but after the 18th, with the circle exception Commencement day 29 mone Says he will keraaps come back with me on fine 7 to from Petershum of perhaps remain there over the foll. Demony: the new forest of the Karivais Exporation also a comfortable little hotel we are told. m 9. 9. K.

Houst son are all well ablowed that home and that a shall always be glad to be son when you can come.

Sincerely yours fire four fours

Readville, Mass. 31 fan 1911
Dear Collins I was so much overwhelmed to the anden frakeling away fry dear wife that I did not know to whom I wroke of what I wrote. But you know what a happy like we have led together and can, I feel sure magine a part & the loneliness of my Jaily life with the dear head of the household no longer, here to counsel in.

24 Jan. 1912.

Dear Dr. Kennedy:-

Weel: ago while I was in Washington. I was there to attend the American Association meetings and also a series of conferences which had been called for all men connected with the Office of Forest Pathology. These conferences extended over nearly or quite four weeks, much longer than we had any of us anticipated. They were very profitable conferences for all of us, however, as each man took up in turn his own work explaining it to the others; the others in turn criticising, suggesting, or questioning, from their own point of view. All the men connected with the office were on hand, including four from Washnigton or eastward, as well as the western men from Nebraska, Montana, Jisconsin, California, and New Mexico.

I shall be very glad to tell you more about the work at some time in the near future, I hope. I shall be very glad also to lurch with you at the first opportunity. I trust we can arrange a mutually satisfactory date before long.

I returned from Washington only last Sunday evening. I now expect to be in Providence most of the time until I go into the field again, probably three or four months hence.

Hather cannot see very well now and is becoming very deaf.

Mother is not able to get out very much, expecially since freezing weather arrived. Otherwise things move on about as usual with us.

We all extend the heartiest greetings of the season to you and yours. Cordially,

Readville, Mass. 26 June 1972 Har Collins Jamplad the 24th now as the Club meets next friday Why can't son come up on that day T lunch & then one with us before going in tothe medicy I have been looking at the time table and don't fruit lings as convernent as my hard tobe but I suggest that you come who tiro to Boston & then come

AND

MILTON, MASS.

Boston, Mass., 20 January, 1919.

Professor J. Franklin Collins,

468 Hope Street,

Providence, R.I.

My dear Professor Collins:

You are of course aware of the existence of a committee of the N.E.Botanical Club, which has as its duty, the collection of material for a new edition sometime of the metropolitan Park Flora. Of the work which has been done so far one of the plantshave been left out of account entirely, the "Cryptogams". This has been done because it was our impression that there are not enough individuals interested in flowerless plants to make it feasible to include any of the different classes of them in the "Flora".

Now that you have taken the responsibility of the Curatorship of this class of plants in the club collection, I feel that it is my privilege your opinion in regard to this. To you think that it would be worth while in getting out the new edition to attempt to incorporate anything but flowers, plants, ferns and their allies?

Yours very truly,

Antains T. Mied

Mr. C. Kingman, 11 Lowell St., Reading Mass.

My dear Mr. Kingman:-

having a vacation, and only this evening have I had a chance to look at your moss. Itis Polytrichum junin-erinum Jilld.

I was very sorry to be unable to get to the last
New England Botanical Club meeting. I tried my best to
get there but the nearest I could get to Boston that
evening was New York City.

I shall be very glad to see the Polytrichaceae that you speak of, particularly the forms of Pl commune from Massachusetts.

Very truly yours,

11 Lowell It. Reading, Mass. Dec. 6. 1911. Dear Mr. Collins. Some days ago, Mrs Dunham sent you a specimen of Polytrichum, collected by me, that interested you. Tast week I wreited the locality again and collected a lot more of it and so I am sending you some of it. the specimen A is the long stender form with appressed leave. while I more nearly resembles the ordinary found, but in this specimen there are many intermediate forms. It is for this reason that I am suding you the specimens Both A and B were sheeted within few feet spart. They grew in a very wet bog, associated with Iphagums

Jorreyanne. - so wet that the roots of the Polytrichum were in water for part of the season it west. It was very abundant over quite . large area. It seems to you microscopically with the commune as for as I can see, but it looks juit sufferent, both is The vet use dry constini: I have resulty found Tolytrichum gracile at Webse, Mass. and my exterminationi has been verified by vure d'uneau. yours simuling. Hy dear Nr. Kingman:

I want to thank you most heartily for the
specimens that you so kindly sent me a few days ago. When I got
them it looked as if I might get a little time to examine than
critically within a few days, but now something has come up that
will proclude my setting a charge to examine them as I want to
until after the middle of January, at which time I expect to return
from Mashington.

Very truly yours,

Groton, Mass, Care indiana, That a = - , him is the hand , is a the 's mittee of arrangements for megt sumer's meeting of the Jossely Society Now it seems geographically impossible to have a full meeting of the com, so I am writing t you twain for ideas. I shall probably go down to Providence the last

of March, and I can fix up finalities with you then, but I think me first. I had thought of the morther part of Oxford o, say Bettel, as good new ground for exploaction, not too inaccess. able, and for time, July 3-6 inclusive. Dr. Fellows thought that a good region. Is there anything I expected in Central Maine, say Pittsfield, or any other place mear?

Write and tell me what you thank, and then we will try to decide. It is very mulikely that I shall attend, as I am planing to work next summer, but 2 will try to fix up arrangements. Have you any ideas as to program? One speaker. or at most, two, should suffice. Most sincerely, Clarence H. Knowlton

Groton, Mass., Jan. 24, 1906. Dear Collins: Miss Clark and I are both interested in your idea about the Kowe Roud Camps, and & think you had better write then about rates for July 3-6, as you suggested. Us we may not be present in persons such an arrangement could be made much easier than the manal one. The only greation

is how many plants me can find. my experi ence with such places has not been very succesiful, but the plants may be mento the be in Providence Feb. 11, and I hope we can settle most things at that the . Where are the lieadquarters of the Somerset R. R.? Didn't the Society west at Bingham omce? Very truly, C. H. Knowlton

groton, Mass., Feb. 1, 1906. Hear Mr. Collins, a as I can't get off for the Club meeting Itis month, a will write a few lines in reference to your letter of yesterday. It seems to me a good idea to write and get Mr. Healeys terms, if you can do so conveniently, so we can know the exact cost. It is evidently a good confortable place for such a sojour but will the flora be extensive enough to satisfy the crowd? I am going to write to Dr. Fellows about it, and get his views, as he metided Bingla very much for writing to Mr. Maffield. Historia are very reasonable indeed. I will try to look in friedly early (say 9) on I. b. !!, and I trust we i an reach some final reliaions them, Tiery truly C. 76. Throughton

Dear Mr. Collins, . . What you have better than ing draft, and of don't see any chance the improvement. I will send it to Mr. norton as soon as I hear from Dr. Fellows about the tickets. will ask Mr. norton to have a proof sent to you. Silverely i. 7. Knowlton

J. Franklin Collins 468 Hope Ets Providence R. D

321 Columbus ave. Boston, Mar. 25, 1906. Dear Mr. Collins, _ dhave just moved into the city, and entered on a new occupa-I am sure I shall like it very much indeed, though I still wise the long botained vacation in summer. I shall try to keep up, however. I enclose a prospectus which I think covers the ground, though it can easily be made more or.

less definite, as you think best. The Towerset R. K. won't come down below #1,98 round trip from Cakland. Knill send It the amountement to Mr. norton, as soon as dhear from you. Ithink you had better write the final prospectus, if posible, so as to add more. local color. That half-tone picture of the camps would prove a good drawing card, & think. most sincerely, C. H. Knowlton

73 - tan, ipr. 11. Dear Follins a real to have the half- tome printed as part of the final amountement. of Mr. Maxfield still has it he will probably be glad to mail it to the secretary for that purpose. If not, your suggestion is all right bit I thought it would make the circular more attractive to incorporate the ent. Will drop a line to mer. Norta. Liverely 1.7. 20

POSTAL CARD.

THE SPACE BELOW IS FOR THE ADDRESS ONLY

Mr. Clarence H. Knowlton, Hingham, Mass.

Dear Knowlton:=

I have looked up the possibility of the Club dinner on May 30th. There seem to be two possibilities inso far as I have investigated. At the Crown Hotel they will give us a room (for which a extra charge of \$2.00 will be made) and a nenu as follows at \$1.00 a plate. Soup, meat (either turkey, chicken, or beef), two vegetables (potato and one other), ice creem, cake, and coffee.

At the Hotel Newman, on Aborn St., (a side street) they will give the following menu (including a small wivete room) for \$1.00 each: - Soup, meat (tarkey, chicken, or beef), fish (whetever kind is on the bill of fare for the hotel in general that day), potatoes (and one other vegetable), salad, ice cream, cale, clives, radishes, cheese, coffee. As I understood it it will not be necessary at this hotel for every one to have same kind of soup or the same kind of meat, provided there is some other kind, which they profer, on the menu for that day, as there would undoubtedly would be, if the kind selected beforehand was not to their liking.

The Crown is on Weybosset St., one of the two main streets of the city, and the Newman is on Aborn St. between Westminster and Washington Sts. Both rather centrally located.

Flease let me know how I can help you further, and when you would like to have the outlines of the trips for the squads.

Cordially.

Hingham, Mass, May 8, 1911.
Dear Collins;

Thank your for

your prompt letter of will talk it over with the committee, If the Newman is as good as the bill of fare sounds, a think that would be our best rendez-vous. Athink me prefer table d'hote, to would be served. the private room? We ionight to return at 7,30. Now con you send me a list of 10 or 12 places which we can put on the program

announcement? If there are enough people me could strung to far as Nesterly. Then as a get returns your can plan your details. Sincerely C. H. Knowlton

Dear Collins: Have you any species of Phragmity from R. D. or any other n. E. State? I want to work out the new England distribution of this grass. If you have any data, Iplease bring it with you Friday, if you can conveniently

Prof. J. F. Collins 468 Hope St. Providence R. Q. Dear Knowlton:-

Your letter at hand. I understood that the dinner would be served in the private room at the Newman. I will make sure of this point later, however. I would suggest the following trips as a preliminary list. I may want to modify it a little when I can have a chance to takk the matter over with Hope and Preston. I have not had a chance to see either of them since your letter came today.

Trip 1. To Diamond Hill, Cumberland, Providence, Co.

Trip 2. To Copper Nine Hill and Sneech Pond, Cumberland, Prov. Co. It would be much better on these two trips (1 & 2) to leave Boston on the 8.20 train, via Franklin. Could reach Providence from either place at 5.28 p.m..

Prip 3. To Snake Den, Johnston, Providence/Co.
Trip 4. To Westerly, Washington Co. Stay on train at Providence,
Trip 5. To Greene, Coventry, Kent Co.

Trip 6. To Oaklawn, Cranston, Providence, 60.
Trip 7. To Warwick Bond and Spring Green, Warwick, Providence, Co.

Trip 8. To Moswansicut Pond, Scituate, Providence Co. Trip 9, To Nayatt, Barrington, Bristol Co.

Trip 10. To Mt. Hope, Bristol, Bristol Col Trip 11. To Newport, Newport Co. Trip 12. To Portsmouth, Newport Co.

All of these trips would enable the members to reach Providence before 6 p.m. on the return trip. For all except the first two it would be best to come to Providence on the 8 a.m. Colonial Express. Trips 3 and 8 would involve a wait of 40 minutes in the city before a car would leave for these places. Trip 5 might have to be abandoned if the Boston train should happen to be 4 or 5 minutes 1 late, as, according to schedule there would be but 7 minutes between trains.

Cordially:

HEATH & COMPANY

W. H. IVES, VICE-PRES.

NEW YORK PHILADELPHIA SAN FRANCISCO 120 BOYLSTON STREET

BOSTON

W. E. PUILSIFFR

Dear Collins; may 25, 1911. are sure of going with R. C. Bean, R. H. Woodward R.a. Ware, Fernald a. L. gunderson, Kinslon Hiegand, Knowlton. F. S. Collins will go on an independent trep with a Companion, & Harrison & his wife are planing to comvisit they have planned! I suppose Floryd will go, 7

grigg & Road are possibilities I think you will not

need to plan more than 10 excursions at the outside, though a fair day might bring out mexpected numbers. These returns furnish a good mucleus for the trip, I ought to put at least 500 spacement to Little Rhody's credit I have been away all the week a wex pected business, or d should have written earlier. Very succeedy C. H. Howlton Dear Knowlton: -

I inclose general outlines for 15 trips, in duplicate.

The last one has been added at the suggestion of W.W.Bailey.

Confidentially I don't think the chances are in favor of his

making the trip, but he might pan out equal to it.

These tries can be cut awart and such of them used as you think best. Some of the longer trips do not leave very much time for collection of specimens, as you will see, and perhaps you will prefer to cut out some on that account (Newport, for instance). I assume that the squads will be chosen by lot, or by some such scheme, and perhaps the trins also. You can count on Preston and myself as component parts of a squads. If it is not contrary to your principle I would suggest that you select one of your members to go to Snake Den (trip 3). and one to go to Moswansicut Fond (trip 8). I will be the second member on one of these trips and Preston will be the second member on the other. This is suggested only because these two trips on the Danielson car are the last two to get started, and it will permit Preston and myself to get all the other squads off before we have to go. Any other way that seems better to you will be equally satisfactory to me . and . I am sure, to Preston also.

In case an unexpectedly large number should come down we could take at least two more squads out on the Danielson dar and drop them at different places. One squad could also be sent out to Lincoln. This town is not included in the minume outlines, as it is better known than the others.

I would suggest, for economy of time, that every member know and have the slip for his trip in hand before he reaches Providence. This will be very essential with trip 5.
Let me know any further suggestions. Cordially,

- Trip 1. To Diamond Fill, Curberland [Providerec, Co.]

 Leave south Station, Joston, et 8.20 a.m. (Back Day at 8.24);

 due at Irent's Hills, R. I. at 3.47.

 Collecting field upgested:— On the east side of the R.H., on and about the hill and to the southward. Car leave Grant's Hills station for Providence at 4.52 (flag station); or Tiamond Fill at tion, 1.2 miles south of G.M. station, at 4.54 (flag station): or Arnold's Hills, I mile south of D.H. etation at 4.57; or Arbots Run, 1.3 miles south of A.H. at tion at 5.01 cm. The ir Providence at 5.28. Notel Newran is about 6 minutes all from the station—— up Taskington street to Aborn, and all a block to left.
- Unionial impress to Inswicence, Droller cor leves co. Market the resolution to at a.10 apr. To we do car it it can be lon which, it is in the roll and the roll for tall a rile farther cart the roll and crosses another brook (the roll and roll and roll and roll and roll and the roll. A few roll and and the roll are roll or more, along the west example base of the shall be rile. The return our leving the shall be roll in the vicinity of 4.40 levels to the right. (mark)

Trip 5. To Greene, town of Coventry, Kent County.

Colonial Express to Providence. Leave Providence Union Station at 3.05. The at Greene at 10.03.

Leven-eighths of a sile west of station (along track) the R.F. crosses the Moosup River, and half a mile farther on, on the right, is Carbunele Lond, within half a mile of the Connecticut line.

A few hundred varia to the south of the track, and in a general way availed with it, is the Moosup iver flowing westward into Connecticut.

Train leaves Greene at 4.27; due in Providence at 5.25.

Noted Lewman about 6 minutes well from the station---up Washington attest to Aborn, then half a block to the left.

Special notice.--If the colonial Express is some three of four Finutes late in reaching Providence this trip will have to be abandoned.

Greene ought to be a good region to visit, however. If one who are are igned to the trip is ould have the following soints in wind

Special notice. -- If the colonial Express is some three of four ninutes late in reaching providence this trip will have to be abandoned. Greene qualit to be a good region to visit, lowever. If ose who are accipied to this trip should have the following joints in which and act quickly in the abstion in providence, as there will be only a few plantes in which to make the connections, even if the colonial is on time:- Do at the car door as you now revidence, in order that you may get off promptly. So down into the subtup (preferably the second one as you enter the station) and injurie of one of the uniformed attendants as to be to reach the 9.05 train for cillimentic. Buy on the train, there ill be no time in which to obtain tickets.

Trip 6. To Caklawn, town of Crinston, Providence County.

Colonial Express to Providence. If the Colonial is on time take the 9.05 tr in (the Milliantic to In) which can be reached via the subsequence. Inquire of uniformed attendant in subway as to how to reach the train. Do not the cor of our the Colonial as you near rovidence of the ball to get off the train promoter. If the truin is three or four minutes late go by trolley at 9.30 from the corresponding to and Canal St. (are run half hourly, Collection grounds probably best about the brooks in the hills half a size west and and beyond.

Return can be sade from the Caklawn station by steam tr in at 3.28; due in Providence at 3.23. Lot I Lemma is hout C is ufer wolk from the Union station --- and income at the Aborn, then half a bloc to the left. Leturn collabor street to Aborn, then half a bloc to the left. Leturn collabor by trolley. Inquire about halter, and as to where to not off at the negreet pairs to hotel Reman on Aborn etc.

Trip 7. To larwich and and Apring Green, town of Marwich, Hent County. Colorial Express to Providence. Leave Providence via Automorals troller ear from in Front of the Information 19.18. (cors run half hourly). Leave car at either Jaring Green or Loxie. Apring Green Ind is quarter of a mile south west of Apring Green tation, and quarter of a mile north est of Monie station. Earwich Lond is five-circhins of a mile couth est of Monie. Little Cand Lond and Tuck and areas close to effect, North Mile northwest of Vine Front wition. All four codes (Earwich the largest) are in the Jarvick sand lains. The last Greenwich cars run bulf hourly along the lithray of the western edge of Eittle Eand Lond, and return could be ado by that car line if decired.

Luttonwood care leave Lonie (Monine Treen 1 minute later) at 5 and 35 minutes and the hour. Lue in Providence about 35 minutes later. inquite of confluctor as to the recreat point to get off for the later and Lond and Lond.

Trip 8. To Moswansicut lond, town of Scituate (the northeastern extremity of this good is in the town of Johnston), Invidence County. Colorial Express to Providence. Leave via Banielson trolley ear (cor. Canal St. and Harbet Square) at 9.40. Cars run hourly. Leave the car before reaching North Scituate (about half a mile) at the point where the car turns 45° to the left from the turnpike in order to go the village of North Scituate. Continue afoot about the kirkury turnpike. In eighth of amile to the south end of Hoswansieut Fond. On the left of the turnpike (i.e. south) half a mile beyond the good to the westward here is grite a bog or swarm.

Cars return to the city every hour. Inquire of the conductor as to the time that the cars leave North Scituate for the city. Take the car that reaches Market Square at 5.40 p... leave this car at About t. Notel Teuman half a bhock to the right, from Tashington t.

Trip 0. To Rayatt, to m of Burriarton, Bristol County.

Colonial Express to Providence. Take the 9.15 electric train from the Union station. Get "Lone Timets" to Rayatt and return at the ticket office in the waiting room in the station. Then conductor comes to collect the third ticket notify him to stop at Payatt. (This station may be a remain atom and no notification recessary) Extensive awarp to the conflicant along the track. Considerable rich moist woodland to the northward (along the lighway).

(ars leave legatt for the city every 15 minutes. The car leaving there at 5.10 is due in Frov. at 5.25; the one leaving at 5.25 (express) is due at 5.40. Noted Hewson is about aim mirutes with 1 on the station—up Tashineton "t. to Eborn, then half a block to the left.

Prin 10. To lit. Lo.e, town of Dristol, Bristol County.

Colonial Express to Providence. Take the 9.15 electric train in the Union Station for Bristol. Tet "Some tickets" in the ticket office in the waiti a room in the station. It. Lo.e is about the miles, slickly north of east, from the Line of time in Bristol. There is a room took from the eastern electric of the village to lit. Hope (which is merely a fill 200 feet ich). Inquire in Bristol at to this mod. Leilage the least collection will be found between the rillage at lit. Hope, in the level land, at her least in the vicinity of the found line hillies ring.

The heart in the vicinity of the found Bristol at 5.20 is the in the Brion mattern, revising at 6.03. Sotel To man is shout in the Brion mattern, revising at 6.03. Sotel To man is shout in the last a block to the left. There is also as hourly troller from Bristol, leaving at 4.10, 5.10, etc. The running time is not available, but it is undoubtedly longer than that of the electric train.

Trip 11. To New ort, city of Lowert, Each inclose Company.

Colo isl Emptors to revidence. Take 1.15 electric train from the Union station. det "Jone tickets" (or arber tickets to Temport-inquire) to Triptol and return. So be the end of the line in Bristol and chance to the Ferry Loat, which were to Torta with an the island of Thode Island. Connecte to the isolary. The in New out it least 11.15. It is a fill to a modern the large to the inclusion of the continuation one (for that is) to the part of the least to the first of the cast of the city of the continuation of the continuation of the continuation of the continuation of the city of the continuation of

- Trip 12. To lortsmouth, town of Portsmouth, lankington County.

 Colonial Express to Providence. Take the C.15 electric train from the Union Atation in Providence, Let "one tickets" in the ticket office in the mitter room, to Bristol and return. Lerk pa ferry tickets also -- inquire. Go to the line in Pristol and change to the ferry boat prossing to Lorts buth. There clampe to the trailey. It is appeared that the collecting le Cone in the vicinity of Fortmouth Trove on t Lauton's Ualley (a nile further on), or both. Inquire about time of leturning cars. Lan to connect with the car emissing at the Union Station in Providence at 6.03. Hourly trains from Spirotol. Noted Terman is about 6 minutes wall from the station---up Eachierton St. to Eborn, then half a block to the left.
- Trip 18. To aquantum, town of Past Providence, Providence County.

 Colonial Empleys to Providence. Er. E. I. Leures offers to the charge of this making squed at the Union Station. It is the profitable to a end get of the last in the roots for a rile east of.

 Riversile Motion (also in East Providence). Liversile is shout a rile and a hlaf outh of Equantum, on the reached by either electric train or trolley. The trip leave Riversile for rovidence at 2. 17, 32, and it inutes not the four. The in the Union station, Providence, but 15 minutes to the four. The trains leave equantum (flug station) the 22 and 32 minutes at the four. Due in a riverse continue in the from Liverside, and from aim highway wear equantum, but the running time is considerably longer.
- 14. To Jakland end (period) Jucker lond, torm of Durvillville, Irritance county.

 Leave Boston on the 8.04 train for Woonsocket (Back Bay 1.00)

 Due Joonsocket, L. I. at 9.35. Trolley for Harrisville, I. T.

 Leaves Toonsocket (not far from the I. K. string, of period from the I. at tion also) at 10.10. Is we the troller cer at takland (in the vicinity of 11 o'clock) one walk couth for another of a mile in the vicinity of 11 o'clock) in walk couth for the interest of the first on the Irritance certain in the county of a string and leave its tooller.

 Li i en acted that Ir. ... actilian will need the agreed at this nint and act a pride. Approached collecting region from 1.15 like into aller the income for movidence at 4.48, Harrisville at 4.47, Saland at 4.37. The infinite wall from the station————

 La bincton Lt. In Aborn, then helf a block to the left. Trip 14. To Valiland and (part ps) Sucker land, torn of Durwillville,

Drip 13. A short traller find to some authors of impridence with i. ...

Briley, servided he is rell enough to take such a trie.

For "ailay's commands tion on the take in an falle a:

Lear Hnowlton;

I have a letter from you dated July 12 which did not reach me very promptly, and since it arrived I have been in the field most of the time, and only today have I had an opportunity to look up the matter. I have looked over my own records and specimens and also those at the University, and report as follows:

Edituate: Coventry and Little Compton. Ilex globra occurs in Richmond. Channock. Exeter and South Kingston. Shannock is on the line between Richmond and Charleston. I do not know whether you want any further points or not. If you do, I shall be glad to supply them so far as I am able.

I hope to see you the first Friday in November.

Very truly yours,

Hingham, Mass. march 19, 1916 Dear Collins; are there any berbarum specimens of the plants on the enclosed list, from R.d.? Some of them are presumably out of range, and the waifs are not especially in portant. the Saxifragaceae for the Club, & have the ranges pretty well fine it except R. S. Sincerely C. H. Knowlton

The remaily immed publication No. 206 of the Carregie Institution of minimpton, outsided "The relation of plants to tide-levels", with Professor Barles I. North as juster author, is a valuable contribution to the science of horonteal cosleny. It contains 162 pages, 24 plates, and several text figurer and bobles. The addition is the result of eight summers' sort on the plants of the inner harbor (an area of about 110 acres) at Sold applies evicer, Long Island. "to determine and record the distribution of the plants scenarior in this harbor is relation to external factors". Suiting from the published results it would appear that the surpose of the investigations, as quoted above, have took admirably settinged. The publication are self surve to a safet for further station of this type is other localities.

Dear Toolins, I am in search of information. The nature of it appears by the inclosed MS. Do yn Isnow of Cognate pairs in mosses? And if so will you give me a lest, on the understanding that the information may bradded to my paper as coming from you? If you have in mind some group, Inhich you can say that These 2 species or those 2 are immediately cognate, and including in consideration the species of the world so as to avail the forsebility of an intermediate in some other country, and the members of the pairs occupy the same grographic range in while or in part - I should he much obliged to you for them, as They will add much for the interest of the discussion. The subject is a good one, I think, which if well contend up will gin us some important Gazings.

your truly,
P. Lantt

My dear Professor Collins: --

Permit me to remind you of your very kind promise to deliver an adress at 4 o'clock in the afternoon on Sunday next at St. Ansgarius' Church on the subject of Carl von Linné, or Linnaeus, as I believe he is called in English. We are all exceedingly pleased at the prospect of such a privilege.

Permit me to remind you, that any friends you should wish to invite, will be very welcome. If there had been admission charged, I should have sent you any desired number of tickets, but as it is, there will be no need of them as the festival is free to all.

With heartiest thanks and best regards

Yours very truly,

C.J. Ljunggren

THE LLOYD LIBRARY AND MUSEUM

THIS institution is legally a stock company, the stock being owned and the institution supported by Curtis G. and John Uri Lloyd. Mr. C. G. Lloyd has erected the buildings and supports the botanical section, and Professor John Uri Lloyd supports the pharmaceutical department. The buildings and contents are transferred to the stock company, and funds are provided for its continuance when the life work of its builders is finished. It will never be sold, and will always be a free and public institution for the benefit of science. Further details regarding the buildings are given on the last page.

OFFICERS OF THE LLOYD LIBRARY AND MUSEUM:

President,
JOHN URI LLOYD.

Secretary, THOMAS BELL.

Treasurer, N. ASHLEY LLOYD.

Librarian, WILLIAM HOLDEN,

Ass't Librarian,

BUILDING No. 1, ERECTED IN 1902.

DEVOTED EXCLUSIVELY TO A MUSEUM OF FUNGE

BUILDING No. 2, ERECTED IN 1907-8,
DEVOTED EXCLUSIVELY TO A LIBRARY OF BOTANY AND PHARMACY

THE LLOYD LIBRARY AND MUSEUM

BUILDING No. 1

This building was erected by C. G. Lloyd in 1902, and was designed to contain both the books and the specimens, the two upper floors being devoted to the books and the lower floor to the specimens. During the short time that has intervened our library has increased so rapidly that the building is inadequate for its purposes, and during the past winter a new building has been erected to be devoted exclusively to the library. The old building, now known as the Lloyd Museum, will contain the herbarium and the mycological collection. The herbarium of pressed plants is estimated at about thirty thousand specimens, chiefly obtained by exchange by C. G. Lloyd during his earlier years. The mycological department contains many thousand dried specimens of fungi, particularly of the Gastromycetes, estimated at not less than five thousand different collections. There are more specimens of this family ten times over than in all the other museums of the world combined.

BUILDING No. 2

This building was erected in the winter of 1907 and 1908. It is four stories, 221/2 x 72 feet. It is devoted exclusively to Botany and Pharmacy (with a section on Eclectic Medicine), and contains a collection of books among the largest on these subjects. The volumes have not been counted, but some idea of the number may be obtained from the following statistics: There are 6,253 linear feet of shelving, and the books now occupy 2,600 linear feet of this space. As a shelf is found to hold on the average 429 books to every 50 linear feet, the estimated number is 22,308 volumes. Cases have been placed in the upper floor, but the other three floors have only wall shelves, with provision made for floor cases in future as the needs of the library may require. When completely filled with shelving the library has a capacity of 11,413 linear feet, sufficient to shelve 98,000 volumes. If the collection of books continues to increase as it has in the past five or six years, the full capacity of this library will be taken in the next twenty years. We do not know that we shall ever accomplish it, but it is our ambition to make the Lloyd Library in time a practically complete library of its subjects.

Cincinnati, Ohio, June 1, 1908.

Professor J. F. Colbins, #468 Hope St.,

Providence, R. I.

Dear Professor Collins:-

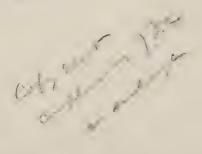

We are making an effort now to complete our publications relating to American botany and have thus far been unable to obtain a copy of "Key to New England trees, wild and commonly cultivated, Providence, 1909," by J. F. Collins and H. W. Preston. Can you favor us with a copy or advise us the publisher or other source from which it could be obtained?

Assuring you that we will appreciate any attention you may show us in the matter, we remain,

Yours truly,

The Lloyd Library.

Dictated U.G.L.

THE LLOYD LIBRARY-Erected in 1908

The Cloyd Library and Museum

This institution is supported by John Uri and Curtis G. Lloyd, and is devoted to Botany, Pharmacy, Materia Medica and allied sciences with a section of eclectic medicine.

The estimated number of volumes is twenty-two or twenty-three thousand, all of them on the above subjects.

The institution is incorporated, is free to the public, will never be sold, and will always remain a free and public institution for the benefit of science.

Dear sir: We beg to thank you for your kindness in sending us a copy of your "Key to New England Trees". We are pleased to have this addition to our library. Yours very truly. The Lloyd Library. E. W.

THE LLOYD LIBRARY-Erected in 1908

The Cloyd Library and Museum

This institution is supported by John Uri and Curtis G. Lloyd, and is devoted to Botany, Pharmacy, Materia Medica and allied sciences with a section of eclectic medicine.

The estimated number of volumes is twenty-two or twenty-three thousand, all of them on the above subjects.

The institution is incorporated, is free to the public, will never be sold, and will always remain a free and public institution for the benefit of science.

Frank yes suriety for the potion of the type watered of the pew variety of tregorium pensylvanium. and doubtles know your try Franked I brave no private collection but place my specimens primarily on the bubarum love at the cocadiny - where the Polygonium inthe form a very welcome adolption.

Gain thaules for your Knowlass in remembery us.

your on truly. Bryand Jong.

March 9, 1917

Mr. Bayard Long Academy of Matural Science, Chiladelphia, Pa.

Doer ir. Long: -

At the suggestion of Professor Fernald, who says that you are interested in the genus Polygonium, I am at this time sending you a portion of room the type of anew variety of P. pennsylvanieum, with my compliments.

Very truly,

Hartford, Jan. 13, '04. Uy dear Prof. Collins. Will you blease send me a afecimen of Districhum Capillaceum B.a.S. which you offer in the January Bryologist. I enclose a stamped envelope. Thanking you in advance, believe me yours sincerely annie Lovens

Hartgord, Oct. 9,05. My dear Mr. Collins. il am sending you my Vermond Buxbaumas registered, as they are all I B. aphylla from vers dans Dunmore, and B. induscata from Willsexply, Do you know of anyone else who has Vermont B. industata? I believe mene was the gust reported,

I am sorry that I have

no duplicates, and I should

but that was in 03,

have liked some of your laine mosses;

Would you like any UD. Marcy N. Y. specimens? I shall offer Sphagnum sedoides Brid, and Mylia Taylori (Hook) S.F. Groy in the November Bryologist. Perhaps they will serve as well as Bux-bournia for exchange. Have you and R. I. hepatics? I have you and R. I. hepatics?

Hoping that the Buxbournias will be satisfactory, believe me, yours sincerely, and Corenz,

Hartgord, Oct. 16, 05. My dear Mr. Collins. Thank you very much for returning my Burgbourniae so carefully, better care than I gave them going over. I think some of the aphylea had gotten away, but I think that is not an uncommon nort in It. The indusiata is all sage. I am very glad if my speci-

mens were of any use to you.

Thank you for your excellent

suggestions as to the small envelopes, - you have had much more experience than &.

My stock of Maine mosses consists of a specimen of your 03 Districtium capillaceum from Somerset Co, and I have no Gasfe' or R. I. mosses, only some of your Dichelyma capillacea from Yora Scotia,

all N. E. bryophytes are gish to my net, Hepaticae as much as mosses.

I shall be glad to exchange with you. Do you collect for the Brown herbarium as well as for yourself? I am collecting for Trinity, as they have no herbarium as yet, yours sincerely and.

Hartford, Nov. 14, '05, lly dear Mr. Collins. Thank you very much for the Vaine and Lucker specimens you so kindly sent. I am very glad to have them all , - I notice you make the Homalia a var, of trichomanorder, is that the latest? Liat, simply say H, Jamesii Schimp.

The Polytichum I have herer yet gathered. Did I send you Hypnum scorpioides from Willoughly, Vt? Or have you it already? I have some pretty good exercises,

Thanking you again, believe me, yours sincerely annie Lovens

96 Garden st, Hartford, Conn.

Hartford, Nov. 20, 05. My dear Mr. Collins.

Thank you for the represent on laine Mosses - I am always glad to have such, Finding addetions to a flora is one of the most agreable of sensations. I hank you also for your Note on the nomenclature of Homalia - H, Jamesu, has at least the merit of taking

up less room, I enclose a frece from Indian Pass, Ut. MacIntyre, N. y. I also found it at dahe Meacham, Ky, It is always on the north side of granute rochs, never limestone, The H. scorpioides from Willoughby is a short piece; the male blant are much more slender, Did you ever collect at Willoughly? It is the best place I know, Relieve me, yours sincerely. He Bardenst, annie Lorenz Hartford, Conn.

Hartford, July 20, 06. My dear Mr. Collins. Enclosed

is a specimen of D. Muhlenbeckir Bas, which you may be glad to have as It makes another N. E. station, It was collected by M. C. Q. Weatherby of E. Hartford, and I sent it to Urs. Britton to make sure. Do you know whether there has been much collecting done about Water -

ville, N. H.? I have never seen any specimens from there. We are going there next week, and of rather expect good picking, I have just been to the Ut. Mansfield meeting of the Vermont Club, where I got a lot of things with Dr. Grout. yours aincerely, annie d'orenz,

96 Garden et, Hartford, Conn.

Hartford, Sept. 7, '06. My dear Ur. Collins.

very much for the reprints, which I am very glad to have; you are very kind to send them. I am glad you had grood hunting.

Enclosed is the Dicramodontium, it had not occurred to me that it was so unusual in N. H. I have 3 atations at Waterville, all near very coldwater.

I was pleased to find it at Tylers' Spring, because I expected it to be there.

if it is fertile. I have never seen it fertile in these Northern states, have you?

Enclosed is Catherines crispa from Conn, I am sorry to send so little, but you can get more from U. C.a. Weatherly, 749 llavist, East Harlford,

Waterville is a frist-rate place, barring the absence of limestone, which always cuts down the list. I found a few specimens in the notel herbarrin, collected

Hartford, Qct. 15, 06. My dear Ur. Collins.

Enclosed is

a specimen which many interest you, from UD. Mansfield. Us. Britton and I got it to Pseudoleshea, and sent it to Dr. Best, who reports it as his substricts.

According to his Revision

According to his Revision (Torrey, Hay 1900) it is reported

from two British Columbia.

It was on a rock facing about east, on the upper life of blansfield, beside the path to the dee lave, I am sorry to send so little, but I have but a scanty supply.

Yours sincerely.

96 Garden st. Hartford, Conn.

Hartford, Oct. 28, 06. My dear Mr. Collins. The Dicanum Muhlenbechir which I sent you from Conn. proven to be D. Bergeri Bland, so I send you corrected labels. for the same. I am very sorry to have misnamed them. Bergeri appears to be pretty common about here. Us. Button says that she has written you Dr.

Bests latest name for the Pseudoleshea, from Ut. Mansfield, I do not always like kindberg's species, Yours sincerely, Annie Lovenz,

96 Garden st., Hartford, Conn.,

fan. 17:07. Did either Mrs. Brutton or I send you a lit of our Lescuraen Judida Knidh from It Mansfuld? I have no record of sending you arry, and want you to have some, but the supply is very limited. If you have note, I will see that you have some. If you can let me know in regard to this, I shall be much obliged. yours sincerely. 96 Garden st. annie dorenz. Hartford, Conn.

POSTAL CARD.

THE SPACE BELOW IS FOR THE ADDRESS ONLY.

M. J. Franklin Collins, 468 Hofe st. Providence, R. L.

96 Garden 20. Hartford, Feb. 1, 67. My dear Mr. Collins.
Here is the Leseuroea for you; I had to get a lit from Us, Britton, as my supply is very searty. There is a description of it in Mac. Cab. III h 273, if you have not the Kindberg. You ought to gind it up in the Gaspe' peninsula. Yours sincerely. annie Lorenz.

96 Garden st Hartford, July 14, 07. lly dear Mr. Collins. Here are a Couple of mosses from the Vermont Botanical Clubs meeting, The Camptothecium was abundant in the Cranberry Bog, north of Poural Pond, E. Pownal, The anacamptodon of got on the way to the meeting. There was a

Gasfei herminende acgain This eummer;

We are going back to Naterville, No. #,

Where it note to get some more good Things,

It am very glad you liked my article

writing it. Yours sincerely,

Christia it. Yours sincerely,

three-joot strip of it on an old maple, where the bank was off, just above the ground, I got some more in Hochanum, at the foot of Mt. Holy-oke, also on maple, a Sew days later.

Can you please tell me whather this Hypmun from Tuckerman's is examination? I had sent it to this Britton, but she says that she is too busy to look up amything just now, and referred me to you.

Shall you be in the

Botany!.
M. Intel Hull.

between my met company 6 - Harry Act and the property

Hartford, Oct 15, 07. My dear Mr. Collins. Thank you very much for your report on my Hypnum from I wekermans, It is evidently one of those puzzlesome Defanoclade. I will look at it next time I am at the Garden, I always used to comhave my Willoughby specimens with Norwegian ones, What foreign mosses most relimeatione.

It have declined the Secretaryship, or it would be the last non in the give, in Spiral attention.

Yours sinceely.

Spiral attention.

Yours sinceely.

semble the White Mt. ones?
What a give time you must have had on the Gaspe penvisula, to judge by Mr. Fervisula atticle! are there good hepatics on those serpentine
hepatics on those serpentine

Here are a couple of Waterville mosses. H. Jamesii is very abundant on all the summits, on the balsam scrub, The letraplodon is from the "V", which is a very choice spot. I have been really getting more hepatics than mosses this summer. Waterville is evidently well

fot. 18, 1907.

My dear Miss Torenz:

New Fampshire mosses. I wish I had time to pick out some to send you in return at this time, but I have had no time since college opened to even look at a moss. You will understand this when I say that this term I am conducting four classes besides some special and graduate work, with no assistance other than that supplied by two undergraduates, neither of whom have ever studied botany before. I have credited you with the mosses on my moss "ledger" so there is some prospect of your getting something in return sometime.

Yes, there sood hepatics in Caspe. I think

you will see some of them later. I got about

600 numbers of Tryophytes and lichens (and a few

fungi) this summer, and more than 200 photographs.

Probably each number will average for 10 specimens.

Ar sorry that you could not accept the Secretaryship,

but I do not blame you for declining. Tr. Chamber
lain writes me that Dr. Trye is to be you next

President. Fe did not say who was running for Secretary however.

Very truly,

The door "loo for no!-

the Flindia which were offer in the current recologist. I have been interested in write article on "Fotes from Watersille".

Thave found Anacamptoden fruiting abundantle of a west exposure at Morth Anson. Taire.

The south of the tree, however, there were other trees which shaded the moss more or less so that the west was, in this case, the direction of the most sun. I have found it growing or elm, maple, and oak.

Wery truly,

Thank
you very much for
all the reprints which
you so kindly sent. I
am very glad to have
them.

It was a great bleasure to meet you.

the other day. I hope that you enjoyed the Boston meeting as much as I did, I wish that I had been able to hear your paper, as I am Interested in Diaporthe but my own came at the same time.

Yours sincerely. Annie Lovenz

garmany seventh.

Hartford, Nov. 13, 1908. lly dear Prof. Collins. Thanh you very much for the reprints of your notes on N. E. mosses. Of those Maine mosses which you mention, we have the fist three at Willoughby. in just such marly places. Probably the fourth is there also, but still undetected.

Here is Georgia gemenlata (Grig) Lindb, from Waterville, N. H. Mrs,

Britton says that it is new to NIH. Do you know what is its N. E. distribution? I want to write it up for Bry, but have no Efecimens for comparison. It year on the ground at the edges of little cares formed by overhanging ledges. I see by your list that you have it from llass. any gurther information that you can give me will be much af headed.

I was for eight weeks at Wateriell, but have been giving more attention to the Misa Amuie Bonéma, Of Goston Marret, Perty ant, 10.

Ty dear is sommer-

Georgia solvenide in a transfer of the Third and and accions glad I on to fet the specimen when I may then I had no a cell one in my herb rium from eliminary. The many evaluation at venture I have seen in a bery so at collection add by J.H.Bears at Venture, Wass. The specimen is a life formulation of d.g. Les seey. I think that year a scinentic unique of new collection for the right of deal benefits.

I have recorded that give the part on recorder to the part of the
